

# Abhipriyo Biswas

## React.js Developer

Ludhiana, Punjab, India | 9646156493 | biswasabhi93@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

### PROFESSIONAL SUMMARY

Front-End Developer with 7+ years of experience designing, building, and shipping production React.js user interfaces for high-traffic, enterprise-scale applications. Deep hands-on expertise across React.js, Redux/Redux-Thunk, AngularJS, and React Native, with a strong record of translating interface designs and requirements into responsive, component-based UI architecture. Skilled in profiling and improving front-end performance, debugging in-browser, and validating UI behavior with Jest, Enzyme, and React Testing Library. Comfortable owning features end-to-end — from Figma-to-code component implementation through REST API integration — while documenting front-end codebases and collaborating cross-functionally within Agile teams.

### TECHNICAL SKILLS

**React & UI:** React.js, Redux, Redux-Thunk, Redux Toolkit, Flux-pattern State Management, AngularJS, Angular, React Native, Next.js, Component-Based Architecture, Storybook, Progressive Web App Concepts

**Languages & Styling:** JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind, Bootstrap, jQuery, Responsive Design

**Build & Tooling:** Webpack, Git, GitHub, npm, VS Code, Jenkins (CI/CD), Docker

**Testing & Debugging:** Jest, Enzyme, React Testing Library, Unit Testing, Browser-Based Debugging, Front-End Performance Profiling & Optimization

**APIs & Backend (supporting):** Node.js, Express.js, Python, FastAPI, RESTful API Design, JSON, HTTP, Redis (Caching)

**Methodologies:** Agile/SDLC, Front-End Architecture, Cross-Functional & Distributed Team Collaboration, Technical Documentation, Project Management

### PROFESSIONAL EXPERIENCE

#### Consultant (React.js Developer) – Contractual Employment

Aug 2021 – Dec 2025

*TELUS Digital (via Etelligens Technologies)*

*Remote, Noida, India*

- Contributed as a front-end contractor on the Sapphire team, building and maintaining React.js UI for CASA, a customer-support application used by call center agents to access customer profiles, billing, service plans, and account dashboards in real time.
- Implemented Redux and Redux-Thunk for predictable client-side state management of backend API responses, shipping reliable production UI features under high-traffic conditions.
- Designed and built custom, reusable UI components and documented them in Storybook, improving component consistency, reuse, and onboarding across the front-end codebase.
- Improved front-end reliability and catch-rate by writing unit and component tests with React Testing Library and Jest, gated on Jenkins CI before merge.
- Troubleshoot and debugged interface issues in production, working with backend teams on REST API contracts; used Redis for caching and GCP Secret Manager for secure credential handling.
- Delivered consistent, on-schedule production releases by working within Agile sprint teams using Git-based version control.

#### Front End Developer

Dec 2020 – Dec 2025

*Etelligens Technologies*

*Remote, Noida, India*

- Developed and maintained production React.js and AngularJS user interfaces for TravelNet (hybrid mobile application) and Alloodo (game-rental client website), plus 5+ additional client projects including Pyro, Local Kings, and Huskarma.
- Built highly responsive, reusable UI components consuming backend REST APIs, and optimized data-driven UI rendering and performance across projects.
- Reviewed application requirements and interface designs with distributed, cross-functional teams, translating them into front-end architecture and component decisions.
- Delivered consistent, on-schedule feature releases by collaborating with remote engineering teams across Agile sprint cycles.

#### Web Designer / Associate UI Developer

Aug 2018 – May 2020

*Promatics Technologies Pvt. Ltd.*

*Ludhiana, India*

- Designed and implemented web and mobile application UI pages using HTML, CSS, Bootstrap, and Photoshop.
- Provided GUI designs and front-end implementation support across concurrent client projects, including UCatch, PortaPrep, Babzer, and GPS Colombia.

### RELEVANT PROJECT

## Job Listings Aggregator — Full-Stack Platform

2026

*React, TypeScript, Redux Toolkit, TanStack Query, Tailwind, Webpack tooling, Jest, React Testing Library, FastAPI, PostgreSQL, Docker*

- Built the React/TypeScript front-end dashboard for an end-to-end job-search platform, consuming a FastAPI + PostgreSQL backend exposing 6+ combinable filters and pagination.
- Designed a type-safe API contract between backend (Pydantic) and frontend (TypeScript interfaces) so schema changes fail the build instead of failing silently in production.
- Implemented Redux Toolkit for filter/search state and TanStack Query for server-state caching and background refetching — deliberately separated, non-overlapping responsibilities.
- Improved front-end performance through list virtualization (react-window), debounced search, and route-based code splitting.
- Shipped CI on the frontend with Jest + React Testing Library on GitHub Actions — 53 tests gating every merge.

## EDUCATION

---

### Bachelor of Arts in Computer Science

Dec 2020 – Apr 2024

*Lovely Professional University*

### Master of Science in Data Science

Jul 2024 – Jun 2026

*Central University of Haryana, Mahendergarh — CGPA: 7.78 (Completed; Degree Certificate Awaited)*

## CERTIFICATIONS

---

HackerRank Skill Certifications: React (Basic), Angular (Basic), Python (Basic), SQL (Basic), SQL (Intermediate)

## ADDITIONAL INFORMATION

---

**Languages:** English, Hindi, Punjabi, Bengali

**Open to:** On-site, Remote, Hybrid positions and Contractor engagements
